

Danny Blaze is a world-class con artist with movie-star charm, zero impulse control, and an addiction to chaos. After burning every bridge in London, Danny flies to Los Angeles to reunite with his oldest friend and former partner in crime, Marcus King, a brilliant strategist who walked away from the hustle years ago to build a quieter, more legitimate life in America. That lasts about three days. Because Danny hasn't come to reconnect. He's come chasing the feeling. The rush. The game.

The blag.

Before long, the two are back doing what they do best, infiltrating the glittering worlds of the rich, corrupt and untouchable. From Hollywood Hills mansion parties and Beverly Hills investment scams to Vegas casino hustles and luxury yacht cons in Cabo, Danny and Marcus become modern-day Robin Hoods in designer suits, stealing from predators who can't exactly go to the police. Danny talks his way through locked doors.

Together, they're unstoppable. Their philosophy is simple: "If they're screwing the world... we're just charging commission." What begins as harmless chaos soon turns into a legendary underground run of increasingly outrageous scams, fake tech investments, private jet infiltrations, art fraud, crypto cons, celebrity impersonations, each bigger, riskier and more addictive than the last. And then they hit the wrong target. While partying in Mexico after pulling off an audacious multimillion-dollar con, Danny and Marcus scam a mysterious investor they believe is laundering dirty money through luxury developments. They celebrate like kings. Until they discover who he really is. The man they robbed is not a businessman.

He is the violently unpredictable head of one of the most dangerous cartels in Mexico, a man who doesn't just want his money back. He wants an example. Overnight, Danny and Marcus go from charming hustlers to hunted men. With cartel sicarios, corrupt officials, bounty hunters and international criminals closing in, the pair are dragged into a brutal world where one mistake doesn't cost money — it costs lives. For the first time in their careers, confidence and charisma may not be enough. Marcus wants out.

Danny thinks they can still bluff their way through. But when innocent people around them begin paying the price, the fantasy of the "gentleman con" comes crashing down. Forced to confront the damage caused by years of manipulation and reckless ambition, the two friends realize there's only one way to survive: They have to pull off the greatest blag of their lives. Not to get rich. Not to escape. But to destroy the cartel empire hunting them from the inside. Explosive, stylish and dangerously funny, *Blag Attack* combines the slick confidence of *Ocean's Eleven*, the chaotic chemistry of *The Hangover*, the swagger and action of *Bad Boys*, and the sharp criminal energy of *Snatch*. A high-octane ride through Los Angeles, Las Vegas and Mexico, *Blag Attack* is ultimately a story about friendship, identity, greed and survival, where the greatest weapon isn't a gun... It's confidence.
